9. Transparency: Public USS dashboard
10. Accountability: Track-level responsibility
11. CSI Alignment: Phase targets mandatory (NEW)
12. USS Monitoring: Real-time progress tracking (NEW)
```

KEY INSIGHT (Updated v1.1)

```
IMPLEMENTATION + MEASUREMENT = SUCCESS

Without USS:
├─ Progress unclear
├─ Phase transitions subjective
├─ Resource allocation guesswork
├─ Problems invisible until crisis

With USS:
├─ Real-time progress tracking
├─ Objective phase thresholds
├─ Data-driven resource allocation
├─ Early warning of problems

THE EQUATION:

├─ Right framework ✓

├─ Right timing (2025-2040) ✓

├─ Right resources ($177M) ✓

├─ Right measurement (USS/CSI) ✓ NEW

└─ = Successful symbiosis

CSI 0.48 → 0.75 by 2040

Measured, managed, achieved.
